נושא: How You Increase Food Security, Employment And Export In 6 Short Months?

Dear Nimrod,

We want to leave a better world for future generations!

I and my team work for a better future, we work for a better world, and we do it with Love.

Do you want to improve your life and the environment? Great, take part in changing our society mode-of-thinking.

Work hard, enjoy your work and make sure **you also make others enjoy** the fruits of your work.

If others enjoy what you do, you contribute to society, and therefore there is a good reason for you to be happy and alive. That is great.

Now, most of the countries in Africa and Asia have over 50% of the working labor make a living from agriculture. That means that most Africans and Asians are **farmers**.

If we want to improve their lives we need to help them to increase their income.

Some leaders say... *'we have a target to increase our farmers' income by 50% in 5 years'*.

You know what? I fully support it.

Furthermore, Biofeed is committed to helping this happen and even help to increase farmers' income by a three (3) digits number. I think it is even better and farmers will be even happier.

What do you think?

[The story of Yacuobuo](#)

Here is the target I set to my team for Africa and Asia; *'farmers should, at least, double their income in 3 years'*.

Watch the video with Yacuobuo, who increased his income from 15,000 to 100,000 France in a single year.

That is a 660% income increase! You see, we do it already.

Biofeed has two aims before its eyes:

1) to do good business in a sustainable manner (quite obvious)

2) to act in such a way that will maximize the positive effect of our deeds on maximum population.

Now you understand why Biofeed find Africa and Asia so alluring?

I see the **Real Green Revolution** starting from here, from Africa and Asia.

I see governments and companies making huge investments in agriculture. Not because they have too much money, but because this is their best way of getting out of economic depression.

Biofeed is totally focused on the **end result**; which is increasing the farmer income while improving our blue planet health.

You do it by decreasing infestation while increasing percent of marketable produce. This alone will contribute 200% to 700% increase in income.

But this is not all. By cooperating with governments and private companies we will **brand the eco-friendly produce**.

Doing so we will be able to maximize the added value for our costumers. By focusing on export we will maximize it even further.

Hence, Biofeed commitment to our Local-Partner is to closely support and grow the local abilities to export fresh produce for premium prices.

My 2019 Business Plan.

Biofeed is fortunate to be the only company with an effective solution to one of the most pressing problems in agriculture - fruit flies.

For 2019 we will choose **3 new local partners** to start work in Africa and India. This is your last chance to become a partner for 2019.

How do you know that you should apply?

If the farmers in your country do not export, or export is in continuous declines.

If your farmers spray and spray... but fruit infestation increase and increase...

If you want your farmers to do better and your farmers trust you.

If you have good connections and relations with the authorities and farmers.

If you are a doer and activist, by nature.

Last, but not least, if you are ready to work hard and ready for great success.

If you answer YES for 2 or more of the above, then you should apply by sending a detailed email to Dotan (dotan@biofeed.co.il), our Head of International Business.

By doing so you are not only securing your future and helping your farmers. You practically make sure you will be amongst the leading countries to accelerate the fresh produce export. Be first, be a winner.

Again, [My Business Plan for 2019](#)

Waiting a year is to lose millions of \$\$\$!

Change is a decision. Better fruit... Better future... Biofeed...

Regards,

Nimrod

P.S. It is now (still) the Holidays in Israel. Which means a lot of holidays with just a few working days. Unfortunately, this impacts our ability to answer your emails. While I ask you to show patient I also urge you to send a reminder if you do not get an answer within a week.

P.P.S. Looking back I cannot believe what an extraordinary year we had (and it is not over yet). In many ways, it is thanks to you. So thank you for being there and thank you for taking this trip with us. I do cherish it.

The **Real Green Revolution**, the way to connect your vision with your business!
